

FRANZCOG Training Program

Logbook Procedure List and Classification

This logbook procedure list provides sites and trainees with the major/minor classification of procedures in the online logbook.

- As detailed in the 'Accreditation Standards and Guidelines for Hospital in the FRANZCOG Training Program – July 2016', the overall trainee average for a hospital must be greater than or equal to 23 major gynaecological surgical procedures as primary operator per 6 month training period.
- Procedures listed are those included for entry into the online logbook (revisions/additions marked with an asterisk* will take effect from mid-2018. Exposure to all procedures listed is not a requirement of the FRANZCOG Training Program. Additional procedures have been included to enable trainees to record their experience even though it may be outside of the requirements of the FRANZCOG Training Program.

Obstetrics

Antenatal Procedures		
Chorionic villous sampling		
Amniocentesis		
External cephalic version		
Insertion of cervical cerclage		
Other		

Intrapartum procedures		
Fetal scalp blood sampling		
Manual removal of placenta		
Shoulder dystocia manipulation		
Other		

Vaginal birth	Spontaneous Vaginal Birth	Instrumental Vaginal Birth
Vaginal birth - unassisted singleton	X	
Low/outlet vacuum		X
Low/outlet forceps		X
Midcavity vacuum in OA position		X
Midcavity forceps in OA position		X
Midcavity vacuum with rotation from OT or OP position		X
Midcavity forceps with rotation from OT or OP position		X

Vaginal birth – assisted breech		X
Vaginal birth – multiple		X

Caesarean section	Basic	Complex
CS without a listed complexity	X	
CS with adnexal procedure	X	
CS at full dilatation		X
CS placental abruption		X
CS abnormal presentation (breech or transverse positions)		X
CS multiple pregnancy		X
CS BMI $\geq 50^*$		X
CS $\geq 4^{\text{th}}$		X
CS classical		X
CS placenta praevia		X
CS placenta accreta		X
CS uterine rupture		X

Perineal repair		
Repair of 3 rd and 4 th degree tear		

PPH $\geq 1000\text{ml mx}$		
Management – general		
Bakri balloon		
Other (B lynch suture, hysterectomy, internal iliac artery ligation)		

Gynaecology

Laparotomy	Minor	Major
Abdominal ovarian cystectomy without hysterectomy*		X
Abdominal (partial or total) salpingectomy +/- oophorectomy without hysterectomy*		X
Hysterotomy		X
Abdominal myomectomy		X
Abdominal hysterectomy (+/- adnexal removal or procedure)*		X
Retroperitoneal node sampling		X
Vault supportive procedures e.g. abdominal sacrocolpopexy		X
Pelvic sidewall dissection		X
Other		X

Vaginal surgery (other than Continence Surgery)	Minor	Major
Repair of perineum		X
Anterior repair only*	X	
Posterior repair (&/or Levatoplasty) only*		X
Anterior and posterior repair without hysterectomy*		X
Vaginal hysterectomy without repair*		X
Vaginal hysterectomy and repair*		X
Vaginal radical trachelectomy		X
Vaginal sacrospinous colpopexy		X
Colpocleisis		X
Vaginal uterosacral vault suspension		X
Vaginal mesh excision		X
Other	X	

Continence Surgery	Minor	Major
Transobturator tape - TOT		X
Transvaginal tape - TVT		X
Other sling		X
Retropubic suspension / open colposuspension		X
Insertion of neuromodulation wires*		X
Removal of sling or tape*		X
Botox injection of the pelvic floor*	X	
Other e.g. fistula repair*		X

Laparoscopy	Minor	Major
R/A L 1 - Diagnostic laparoscopy	X	
R/A L 2a - Tubal ligation	X	
R/A L 2a - Simple cyst aspiration	X	
R/A L 2a - Simple adhesiolysis	X	
R/A L 2a - Ablation of APS i-ii endometriosis	X	
R/A L 2a - other	X	
R/A L 2b - Salpingotomy/salpingectomy for treatment of ectopic pregnancy		X
R/A L 3a - Ovarian cystectomy (normal anatomy)		X
R/A L 3a - Oophorectomy (normal anatomy)		X
R/A L 3 - other		X
R/A L 3b - Laparoscopically-assisted vaginal hysterectomy (LAVH)		X
R/A L 4 - Excision of APS III endometriosis		X
R/A L 4 - other		X
R/A L 5 - Total laparoscopic hysterectomy (TLH)		X
R/A L 5 - Laparoscopic burch colposuspension		X
R/A L 5 - Laparoscopic sacrocolpopexy		X
R/A L 5 - Laparoscopic myomectomy		X
R/A L 5 - other		X
R/A L 6 - Laparoscopic pelvic floor repair		X
R/A L 6 - Excisional of aps iv endometriosis		X
R/A L 6 - Oophorectomy of residual ovary (distorted anatomy)		X
R/A L 6 - Laparoscopic lymph node dissection (pelvic and para-aortic)		X
R/A L 6 - Radical hysterectomy		X
R/A L 6 - other		X

Hysteroscopy	Minor	Major
Diagnostic hysteroscopy +/- dilatation and curettage (D&C)	X	
Resection of endometrial polyps	X	
Resection of submucous fibroids		X
Management of uterine abnormalities e.g.septa		X
Endometrial ablation		X
Other (including hysteroscopic retrieval of an IUCD, division of intrauterine adhesions)*	X	

Cervical management	Minor	Major
Colposcopy	X	
LLETZ	X	
Cervical cauterly or laser	X	
Cone biopsy	X	
Other	X	

Perineal surgery	Minor	Major
Perineal (e.g. Bartholin's) abscess marsupialisation or drainage*	X	
Vulval biopsy or excision	X	
Perineoplasty (e.g. Fenton's) or Perineorrhaphy*	X	
Other	X	

Other gynaecological procedures	Minor	Major
Endometrial sampling, outpatient	X	
Suction D&C or vacuum aspiration*	X	
Dilatation and curettage (no hysteroscopy)	X	
IUCD insertion	X	
IUCD removal	X	
Cystoscopy	X	
Other	X	

Oncology Procedures*	Minor	Major
EUA for cervical cancer*		X
Simple vulvectomy		X
Radical vulvectomy*		X
Lymph node dissection (not laparoscopic e.g. inguinal)*		X
Debulking of gynaecological cancer*		X
Other*		X
